**THE INTERNATIONAL SOCIETY
FOR THE STUDY OF SUBTLE ENERGIES
& ENERGY MEDICINE**

The International Society for the Study of Subtle Energies and Energy Medicine (ISSSEEM), is an interdisciplinary organization for the study of energetic and informational interactions. The Society is concerned with the study of informational systems and energies that interact with the human psyche and physiology, either enhancing or perturbing healthy homeostasis. The Society was organized in the fall of 1989.

Subtle Energies is designed to meet the needs of experimentalists, clinicians and theoreticians who pursue an interest in consciousness, and the dynamics and limits of human potential, by employing rigorous and ethical scientific methodologies and clinical procedures. It is explicitly inter-disciplinary to allow those with a deep understanding of one discipline to compare insights with those attained by others working along different paths. It is the hope of the leadership of the Society that through carefully prepared and edited publications the Society will stimulate ISSSEEM interest in the greater scientific community.

Membership dues sustain the Central office and provide members with quarterly newsmagazines and general mailings. The Society encourages the exchange of information through conferences, seminars, and workshops. The Fifth Annual Conference will be held in Boulder, Colorado, June 23-26, 1995. Program details are available from the Society's Central Office.
