Soaring with

instruments

The PERAVIA barograph works without ink or carbon, produces a clear, extended record with constant scale and rectilinear coordinates, sufficient for 30 hours flights. Many national and world records have been registered with this recording instrument of high precision in the United States of America, South Africa, Europe, India etc.

The PERAVIA barograph is the most well-tried and improved altigraph for all kinds of performance and training flights.

Pilots of private aircraft or sailplanes also praise the other PERAVIA instruments like the turn- and bankindicator, the accelerometer and accelerograph.
